EXPERIENCE

Backend Developer

PT Phincon – Jakarta, Indonesia (On Site)

Jan 2024 – Juli 2025

- Develop and maintain web api middleware services for the **MyTelkomsel app** using **Node.js** and **Express.js** to bridge communication between mobile applications and core backend APIs.
- Implement request validation, error handling, and consistent response formatting. Write unit tests with **Jest** to improve code reliability and support mobile team development.
- Troubleshoot and resolve production issues.
- Support backend configuration responses for SIT and UAT testing environments.

Fullstack Developer Trainee

PT Phincon – Jakarta, Indonesia (On Site)

Oct 2023 – Dec 2023

- Participated as a trainee in an intensive **Fullstack Developer Program** covering **ReactJS, Material UI, CSS, Sass, Jest, React Redux, Redux Saga, Express.js, Node.js, Redis, MySQL**.
- Worked on real boilerplate projects for handling frontend development tasks.
- Collaborated with fellow trainees to build both backend and frontend components within a team environment.
- Completed a final project by developing a locally-run **Laundry Management Web App (EasyWash)** integrating **OpenStreetMap** for location mapping and **Stream.io** for chat functionality.

Software Developer Internship

PT Javan Cipta Solusi – Yogyakarta, Indonesia (Remote)

Jun 2021 – Aug 2021

- Collaborated in a team and assisted in developing a website using **Laravel** (PHP) for the back end and **VueJS** for the front end.
- Handled minor development tasks, implementing small features, and performing database operations using PostgreSQL.

PROJECTS

MyTelkomsel App

PT. Phincon

January 2024 - Juli 2025

- Developed and integrated middleware services connecting **internal and external APIs** for the **MyTelkomsel mobile application**.
- Collaborated with cross-functional teams to integrate APIs with internal and external systems.

EasyWash Website

PT. Phincon

December 2023

- Developed a locally-run web application for managing laundry transactions and services.
- Integrated **OpenStreetMap** API for interactive location mapping of laundry outlets.
- Implemented **Stream.io** for real-time chat functionality between customers and service providers.
- Utilized **ReactJS** for the Front end and **Express** (Node.js) for the Back end.

Financial Management Desktop App

Yayasan IT Nurul Ilmi Aini – Bandar Lampung, Indonesia

2023

- Developed a desktop application for managing school financial data.
- Implemented CRUD functionality for managing financial data, Student data, user login.
- Backend built with **Tauri App**, **tauri-plugin-sql**, and **SQLite**.
- Frontend built with **ReactJS**, **Material UI**, **React Redux**, and **React Router**.

EDUCATION

Bachelor of Computer Science

Institut Teknologi Sumatera – Indonesia

Relevant Courses: Web Programming, Advanced Web Programming, Databases, Mobile Application Development

SKILLS

Languages: JavaScript

Frameworks & Tools: NextJS, ReactJS, Express.js, Tailwind CSS, Git

Testing: Jest

Databases: MySQL, PostgreSQL, SQLite

Other: Redis, React Redux, Redux Saga, Material UI, SaaS, Jenkins, Kubectl
